

LINK is the world's first and only multi-channel wireless USB audio transmitter designed for Xbox One and 2019 LG OLED and NanoCell TVs. LINK connects to sources through a USB cable and delivers up to 7.1 (8 channels) of uncompressed 24bit/96kHz audio. The design of the LINK eliminates speaker wires with the WiSA compliant wireless audio connection.

EASY SETUP

Connect LINK to your Xbox One, 2019 LG OLED or NanoCell TV, Windows PC, or MAC using the provided USB cable. Simply follow the TV's on-screen setup guide or use the LINK mobile app to pair your WiSA multi-channel speaker system.

LINK MOBILE APP

The LINK mobile app for iOS and Android provides complete control and fine tune adjustment of your audio system. The app's advanced features allow users to adjust volume trim on each independent speaker, adjust EQ settings, and more.

WiSA TECHNOLOGY

The LINK USB transmitter is a component of a WiSA wireless home theater system and connects to WiSA certified speakers.

SPECIFICATIONS

Wireless Audio	WiSA compliant transmitter with 24bit/96Hz wireless audio connection
Mobile Connection	Bluetooth 4.2 Low Energy
Number of Audio Channels	8 channels of audio
Max Number of Connected Speakers	Supports up to 32 speakers
