

FLASH START REMOTE

Compact RS-232C Remote Control

If you need remote control of multiple devices under the most demanding live situations, the Denon Professional Flash Start Remote is exactly what you want. For sporting events, theaters, radio and TV stations, the Flash Start Remote utilises RS-232C commands to initiate cues and transport control of the connected devices, which includes the 500 and 700 Series Denon Professional media players and recorders.

Flash Start Remote audio and sound FX files can be easily assigned to each of its twenty Hot Start buttons for instantaneous triggering of any sound file. With its simple single cable solution and requiring no special PC software at all, you'll be confidently in remote command of multiple devices.

Features

- Works with Denon Professional and Marantz Professional RS-232C-enabled media players and recorders
- Instantly START/STOP audio files
- Tape recorder-style buttons for transport
- Scribble strips for naming Hot Start buttons
- Control of Windows and Mac IOS applications via USB interface
