

PD 30A

AC POWER DISTRIBUTION BOX

Description	PD 30A distributes power to three XPS 16K amplifiers in a 19" RACK and provides auxiliary power. The 2RU, 370mm deep box is made of 1.5mm sheet metal. It is powered by a 1.5m cord with a 30A five-pole NEMA L21-30P plug; power can be 120V N-L or 208V L-L. Each XPS 16K supply has a 30A breaker to interrupt the line and ends in a Neutrik NAC3FC-HC connector. The three sends have different lengths to optimize wiring. A 20A breaker is upstream of the front auxiliary. The other two auxiliaries are on phases Y and Z with fuses. Front auxiliary is a double NEMA 5-15 socket (AUX1). Back auxiliaries are 2 NEUTRIK POWERCON NAC3MPB (AUX 2 and 3). 3 neon indicators show phase presence. 6 speakon NL4 cables optimize wiring of the amplifiers inside the rack and connect to 3 P-COM 8 poles connectors on the front.
